**Lupus Science and Medicine Strings**

“quality of life” OR “QOL” OR “HRQoL” AND “long term organ damage” OR “damage accrual” OR “LTOD”

Abbreviations: HRQoL, health-related quality of life; LTOD, long-term organ damage; QoL, quality of life; SLE, systemic lupus erythematosus.

Figure S1. Flow Diagram of the Literature Review Process

162 articles identified through database screening

160 articles after duplicates removed

160 articles assessed for eligibility by abstract

98 articles assessed for eligibility by full text

71 articles included

62 articles excluded

27 articles excluded
Table S2. Additional Key Opinion Leader Recommendations for Revisions to the Draft Conceptual Model

Recommendations

- Improve clarity by specifying the impacts of different areas of OD
- Provide further clarification or an improved definition of concepts such as HRQoL (eg, defining low HRQoL as impacts on energy levels and daily activities, family life and relationships, family planning, recreational activities, and appearance/self-esteem) and economic impacts
- Clarify the increased risk of mortality associated with OD
- Reorganize the presentation of the different treatments to acknowledge that although steroids become dangerous at high doses for long periods of time, they are quite helpful at lower doses, and that antimalarials may lead to OD under certain circumstances
- Adjust some of the clinical outcomes and treatment goals, including the addition of improvement of HRQoL as a treatment goal

Abbreviations: HRQoL, health-related quality of life; OD, organ damage.
